Trainer Information

Cathy Warner has over 40 years of nursing experience, the last 20 of which have been in Primary Care. She currently works as Lead Respiratory Specialist Nurse for a large, 8 practice PCN. Cathy holds post graduate qualifications in Asthma, COPD, Spirometry and Allergy and has recently completed a Masters Degree in Respiratory Practice; as well as being a Non-Medical Prescriber. She is the Guardian of the Wiltshire Airways Nurse Group (WANG) which she was instrumental in setting up several years ago. Cathy has extensive experience as a Trainer, having worked both as a regional Trainer for Education for Health, a Facilitator on the IMP2ART project as well as her own independent training.

To book a place/s email

bookings@networkforpractices.co.uk

Our acceptance of your booking brings into existence a legally binding contract between us on the following Terms & Conditions - If places are booked but cancelled before payment has been made or a candidate DNAs, the fee will remain due. Cancellations will attract a refund if the course is subsequently fully booked. To avoid any confusion, we ask that Cancellations are by email only. We will make every effort to resell the cancelled place. Where places are free a £45 charge will be applied to cancellations/DNAs. Payment is required within 30 days from date of invoice.

Introduction to Objective Testing

Date: 4th March 2025
Times: 0930-1630
Venue: Rowdefield Farm Training & Education, SN10 2JE
Places available: 15
Fee/s: NfP Members £105
Non-Members £150

This workshop is suitable for: Registered Health Care Professionals / Assistant Practitioners & Nurse Associates.

Introduction

Respiratory conditions constitute a significant proportion of the workload in primary care. A range of objective tests can help to illuminate the potential cause of symptoms such as cough, shortness of breath or chest tightness. Understanding the range of tests available, how they might be used and which tests might be appropriate in different situations is key for the health care professional.

This interactive workshop will introduce a variety of objective tests and use case study based learning to help increase the clinicians confidence in their use?

Learning Outcomes & Workshop Objectives

This course will introduce you to the variety of objective testing available to assist with the diagnosis and management of respiratory disease. This will include but not be limited to:

- Basic observations
- Spirometry (a brief introduction)
- Peak flow
- FeNO
- Blood tests
- X-ray
- CT scanning

“Interactive, Informative. Brilliant” “Very informative and interesting”
